This working group is a public forum and therefore all information shared will be publicly available.

Meeting Notes

1) **HL7 Connectathon Track Webinar Debrief** (Dave Hill, MITRE)
   - Reach out to the track lead, Sean Mahoney, for any questions (smahoney@mitre.org)
   - There are no online options for attending, only in person attendance is available

2) **Continued Use Case Discussion** (Steve Buslovich, Patient Pattern)
   - Consensus reached last week on assessments (CAM (short form), BIMS, and PHQ-2 through PHQ-9
   - The group discussed if any of the assessments will be required
     - It was mentioned that assessments could be required between post-acute and post-acute settings. However, acute settings are not standardized on these forms
   - The group agreed that there is a need to separate clinical requirements compliance (regulations) requirements
   - There was general consensus that the approach should be: "If it is available, provide it. If not, provide a reason"

3) **Acute Care Cognitive Assessments** (Mary Anne Schultz, CSUSB)
   - Mary Anne stated that the discussion, in her opinion, was finalized last week and asked if there were any more questions
   - It was stated that there is a need to highlight or flag when an acute setting performs a CAM for delirium, which should make all other assessments invalid until delirium is deemed gone

4) Open Discussion
- Tim Schaffer (MITRE) is interim technical lead for the Cognitive Workgroup
- EHR Vendors are still needed for testing
